

## Ethan Adams

Levi recently had his bike stolen after leaving it in a sketchy area with no cameras.

He then had to buy a new bike (which cost him a lot) since that was how he got around since he couldn't afford a car yet.

His coworker, Erwin, heard about what happened and suggested that Levi download this bike tracking app to prevent it from happening again.

Levi downloads the app and sets up the tracker on his bike.

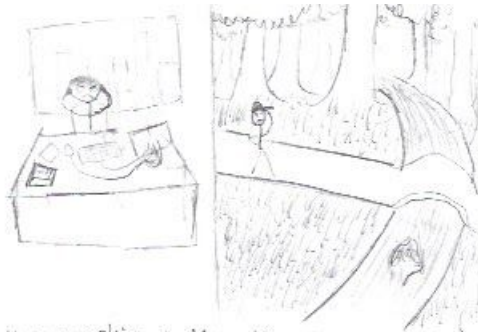

Now that Levi has the bike tracker, he's able to see where his bike is at all times and will be notified if someone tries to steal it.

With the help of the app, he was able to catch the person who took his previous bike and prevent more bikes from being stolen.

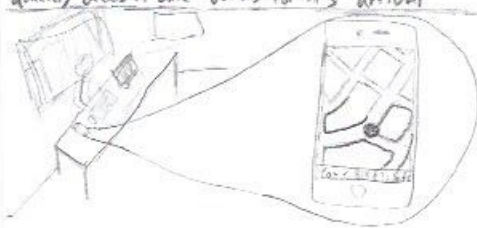

Zayn prefers the open ride rather than driving to work. However, he often faces an issue

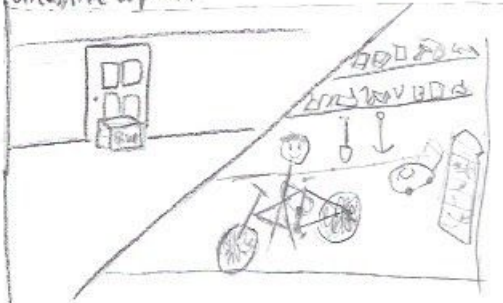

When working in the office, Zayn worries about the safety of his expensive bike. Also, he often cannot remember where he left his bike when in new areas like a park.

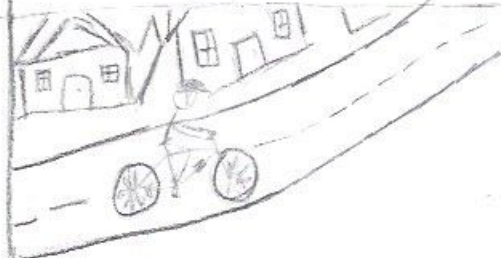

One day, Zayn sees an ad for a Bike Locator that would solve all his problems. He quickly orders it and waits for its arrival.

Zayn can now work in peace knowing his bike is safe and sound where he left it.

The Package arrives quickly and Zayn is easily able to attach it to his bike.

With two rechargeable battery packs and a yearly subscription, Zayn never has to worry about the whereabouts of his bike ever again!
